### Einband Rückseite:

The 17<sup>th</sup> congress of the Association Internationale pour l'Histoire du Verre (AIHV), held in Antwerp, Belgium, from 4 to 8 September 2006, brought together scholars from all over the world specialized in the history of glass. AIHV is an international organisation whose membership spans the globe, from Los Angeles to Tokyo and from Helsinki to Adelaide. Since its creation 50 years ago, AIHV members have studied and reported on the extraordinary development of glass in all historical periods in the Annales of the AIHV. Next to containing numerous contributions on the use, manufacture and trade of glass in the Antique period, also the importance of glass in more recent historical periods, starting from the 15<sup>th</sup> century and ending in the 21<sup>st</sup> century, are dealt with in detail. Additionally, apart from contributions on stained glass, on glass decoration and the use of enamelling, a substantial series of papers dealing with the chemical analysis of glass form part of this proceedings volume.
